DISTRICT SURVEY REPORT TIRUPPUR DISTRICT

Chapter	Content	Page No.
1.	Introduction	4
2.	Overview of Mining Activity in the District	4 – 5
3.	General Profile of the District	5 – 8
4.	Geology of Tiruppur District	9 - 12
5.	Drainage of Irrigation pattern	12
6.	Land Utilisation Pattern in the District: Forest, Agricultural, Horticultural, Mining etc.,	13 – 14
7.	Surface Water and Ground Water scenario of the District	14 – 15
8.	Climate and Rainfall of the District	16
9.	Details of Mining Leases in the District	17 – 43
10.	Details of Royalty or Revenue received in last three years	44
11.	Details of Production of Minor Mineral in last three years	45
12.	Mineral Map of the District	46
13.	List of Letter of Intent (LOI) Holder in the District along with its validity	47 – 51
14.	Total Mineral Reserve available in the district	51 – 75
15.	Quality/Grade of Mineral available in the district	76 – 77
16.	Use of Mineral	77
17.	Demand and supply of the Mineral in the last three years	78
18.	Mining Leases marked on the map of the district	79 – 89
19.	Details of the area of where there is a cluster of the mining leases	89
20.	Details of Eco-sensitive area	90
21.	Impact on the environment due to Mining activity	90 – 91
22.	Remedial measures to mitigate the impact of mining on the environment	91 – 93
23.	Reclamation of the mined out area	93 – 95
24.	Risk assessment & Disaster Management Plan	95 – 96
25.	Details of Occupational health issue in the District	96 – 97
26.	Plantation and Green belt development in respect of leases already granted in the district	97
27.	Any other information	98

1. Introduction

In pursuance to the Gazette Notification, Ministry of Environment, Forest and Climate Change (MoEF & CC), the **Government of India Notification No. S.O.3611 (E) dated 25.07.2018** laid procedure for preparation of District Survey Report of minor minerals other than sand mining or river bed mining. The main purpose of preparation of District Survey Report is to identify the mineral resources and developing the mining activities along with other relevant data of the District.

This District Survey report guide systematic and scientific utilization of natural resources, so that present and future generation may be benefitted at large. The purpose of District Survey Report (DSR) is “Identification of areas of aggradations or deposition where mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and installations where mining should be prohibited”.

The District Survey report (DSR) contain mainly data published and endorsed by various Departments and websites about Geology of the area, Mineral Wealth details, Details of Lease and Mining activity in the District along with Revenue of Minerals. This report also contains details of Forest, Rivers, Soil, Agriculture, Road, Transportation and Climate etc.,

2. Overview of Mining Activity in the District

Mining activities carried out in the District is Opencast Semi Mechanized/ Mechanized and Manual method.

The Economic important mineral found in Tiruppur District are mainly Gypsum, Kankar, Magnesite, Dunite, Quartz, Feldspar, varieties of colour Granites (Dimensional stones), Rough stone (Aggregates) and Gravel/Earth. Mining activities based on these minerals are very less. However, numerous Rough Stone quarries are under operation for production of construction materials and earth fill (gravel) in Kodangipalayam, Morattupalayam, Madathukulam, Kiranur, Moolanur areas in the

district. In addition to above, 'Dimensional Stones' (Granite) is also available in Avinashi, and Kangeyam Taluks.

The office of the Assistant Director, Department of Geology and Mining is functioning under the control of District Collector, Tiruppur. The Assistant Director, Geology and Mining is assisting the District Collector in the Mineral Administration works.

3. General Profile of the District.

Tiruppur District is located in the western part of the state of Tamil Nadu at 11°18"N and 77°25"E. The headquarters of the district is in Tiruppur city. It is located on the banks of the Noyyal River.

The Tiruppur District bordering the Western Ghats and is surrounded by Coimbatore District in the West, Erode District to the North and northeast and Karur District in the East and Dindigul District in the South East. To the south, a minimum part of the district is bordered with Idukki District of Kerala state.

DIVISION	TALUKS	FIRKA'S	VILLAGES
Tiruppur	Tiruppur North	2	7
	Tiruppur South	3	16
	Avinashi	4	41
	Uthukuli	2	49
	Palladam	4	29
Dharapuram	Dharapuram	7	71
	Kangayam	4	44
Udumalpet	Udumalpet	5	75
	Madathukulam	2	18

The District is named after the city of Tiruppur. The district is well-developed in textile industry and dyeing and bleaching of raw cotton materials. Tiruppur is well known for the cotton market, Kangeyam bull and the famous Uthukkuli butter.

Tiruppur is known for the cluster activity and mostly each activity of garment making is being carried out by outside units say Knitting units, Dyeing & Bleaching

Units, Fabric Printing, Garmenting, Embroidery, Compacting and Calendaring and other ancillary units.

Amaravathi Dam at Amaravathinagar is located in Indira Gandhi Wildlife Sanctuary in Tiruppur District. It was built primarily for irrigation and flood control and now 4 megawatts of Hydal Electric Power Generating unit commissioned.

The major horticulture products cultivated in the districts are Fruits (Mango, Amla etc.,) vegetables medical plants etc., In Tiruppur District ,Coconut is grown mainly in Gudimangalam Block (9000 Hec.) followed by Udumalai 5346 Hec., Kundadam 3870 Hec. Pongalur 3508 Hec.and Madathukulam 3041 Hec.. Remaining area of the district contributes to 2200 Hec.

In Tiruppur District, Kangayam Taluk plays a major role in procuring copra for oil production. Coconut production play major role in farming the Agro based industries namely production of coconut oil and other by-products of Coconut like coirindustries, Husk production etc.,

PL ATE - 1

Other statistics of the district is given below:

1.	Area	:	5186.34 Sq.K.M.			
2.	Population (as per Provisional 2011 Census)	:	24,79,052			
			Male	Female	Others	Total
			12,46,159	12,32,893	0	24,79,052
			Rural	Urban	Total	
			9,57,941	15,21,111	24,79,052	
3.	No. of Revenue Divisions	:	3, Tiruppur , Dharapuram& Udumalpet			
4.	No. of Taluks	:	9			
5.	No. of Revenue Villages	:	350			
6.	No. of Panchayat Unions	:	13			
7.	No. of Village Panchayats	:	265			
8.	No. of Town Panchayats	:	16			
9.	No. of Municipalities	:	5			
10.	No. of Corporation	:	1 - Tiruppur			
11.	No. of Parliamentary constituencies	:	5 - 1)Tiruppur (Part),2)Pollachi(Part),3)The Nilguries (Part), 4)Coimbatore(Part) and 5)Erode(Part).			
12.	No. of Assembly constituencies	:	8			
13.	Irrigation (Major Ayacut Area)	:	1. P.A.P.		120685 Hec.	
			2. Amaravathi-Dam		10223 Hec.	
			Amaravathi - River		25250 Hec.	
			3. Lower Bhavani Project		4082 Hec.	
14.	Road	:	1. State Highways		625.516 km	
			2. Sugarcane Road		103.771 km	
			3. Other District Roads		1634.661km	
			4. Major District roads		471.750 km	
			5. National Highways		NH47- 35km; NH67- 68km NH209 - 25km	
15.	No. of Noon meal centre	:	1300			
16.	No. of Anganwadi Centre	:	1509			
17.	Schools	:	1. Primary		864	
			2. Middle		294	
			3. Higher		96	
			4. Higher Sec.		87	
			5. Matric		141	
18.	No. of Primary Health Centre/Sub Centre	:	44 PHCs - 242 sub centres			
19.	Total No. of Hospitals/Beds	:	8 Hospitals - 948 beds			
20.	Hostel	:	SC	BC	ST	
			18	24	-	
21.	No. of Self Help Groups	:	13515 Women Self Help Groups & 553 Men Self Help Groups			
22.	No. of Police Sub Divisions	:	7			
	No. of Police Stations	:	34			

4. Geology of the District:-

Tiruppur district of Tamil Nadu forms a part of southern Granulitic terrain and is predominantly occupied by crystalline rocks of Archaean to late Proterozoic age. Regionally, the rocks can be grouped under five categories namely

- i. Charnockite Group represented by Charnockite, Pyroxene Granulite and Magnetite Quartzite,
- ii. Peninsular Gneissic Complex (II) comprising hornblende-biotite gneiss,
- iii. Basic intrusive include Pyroxinite/Dunite
- iv. Younger intrusive comprising, Nepheline-Syenite, Pink Granite, Pegmatite and Quartz veins and
- v. Quaternary sediments of Kankar and soil.

Stratigraphy of the area

Age	Group	Lithology
Holocene		Block cotton soil/clay±gypsum
Cenozoic		Kankar/calc-tufa
Neoproterozoic	Acid intrusives	Quartz veins Pegmatite Pink Granite
	Sivamalai syenite Complex	Nepheline-syenite
	Chalk Hills (Basic Intrusives)	Pyroxenite/Dunite
Archaean-Palaeoproterozoic	Peninsular Gneissic Complex (II) PGC (II)	Pink Granite Gneiss Hornblende Biotite gneiss
Archaean	Charnockite Group	Charnockite (Unclassified) Pyroxene Granulite Banded Magnetite Quartzite

Source: GSI, Misc. Pub. 30, 2006

Tiruppur District is predominantly occupied by hornblende Biotite gneisses of PGC (II) with enclaves of Magnetite Quartzite, Pyroxene Granulite and Charnockite. The area exposes several bands of Pyroxene Granulite which is medium grained, medium to dark grey in colour and stand out prominently in the gneissic country generally parallel to regional foliation. Charnockite is coarse grained, massive, many places it is foliated, grey coloured and greasy and exposed as bouldery outcrops and small knolls. It is well exposed in Central, Western and Southern parts of the Tiruppur District. The general strike of foliation varies from ENE-WSW, E-W with dipping towards NW and N respectively.

Hornblende-Biotite gneiss is well foliated, medium to coarse grained, pale grey and exposed as sheets and small knolls. Pink Granite gneiss occurs as thin bands and lensoidal bodies. It is a medium grained rock composed of alternating bands of mafic (mainly of biotite and hornblende) and felsic (Feldspar and Quartz) minerals. It is well recognized in Avinashi area.

Basic intrusives such as pyroxinite/dunite occurs as Outcrop and lensoidal bodies in the country rock and mostly concordant to the regional foliation. Many basic intrusive are reported in south and south-east of Tiruppur town. The trend of these bodies is east-west.

Nepheline syenite is a leucocratic, coarse grained rock and composed mainly of Feldspar with Nepheline and shows pitted appearance due to removal of Nepheline. This alkaline rock is available in and around Sivanmalai area only.

Acid intrusives comprising pink granite, pegmatite and quartz veins are traversed country rocks in micro (cm wide-meter long) to meso-scale (few meter wide and several meter long) extend. Granite is exposed around 9 km SW of Avinashi. Small scale pegmatite and quartz veins are noticed almost in all the rock types.

Acid intrusives are overlain by sediments of Quaternary age, represented by Kankar and black cotton soil with Gypsum. Most of the area is covered by brown and

red brown soil. Some part of the area covered with black cotton soil contains Gypsum as lumps. Black cotton soil covers south-western part of the district.

5. Drainage and Irrigation Pattern

Drainage

- The major rivers flowing through the district are Noyyal and Amaravathi, which come under the Cauvery basin
- Chinnar and Tenar rivers are the main tributary of Amravati River, which is the main source of irrigation in the district
- Nallar and Palar river are covered under the Parambikulam-Aliyar basin
- Both Amaravathi dam and Thirumurthy dam are the prime source of irrigation in the district, whereas Uppaar dam is another dam which receives water from seasonal rains.

Irrigation

Irrigation is the artificial application of water to the soil for normal growth of plants. Water is an important determinant factor for production of crops in agriculture sector. Intensive and extensive cultivation of land depends mainly on the availability of water. Medium and minor irrigation schemes are implemented in the state for augmenting the water supply for agriculture. The various sources of irrigation are canals, tanks, tube wells, ordinary wells, springs and channels. The following Table 63 shows the area irrigated in the District.

Irrigation of the Tiruppur District

Irrigation	Area ('000Ha)
Net Irrigated area	119.3
Gross irrigated area	123.1
Rain fed area	72.9

Source : Statistical Handbook of Tamil Nadu 2013

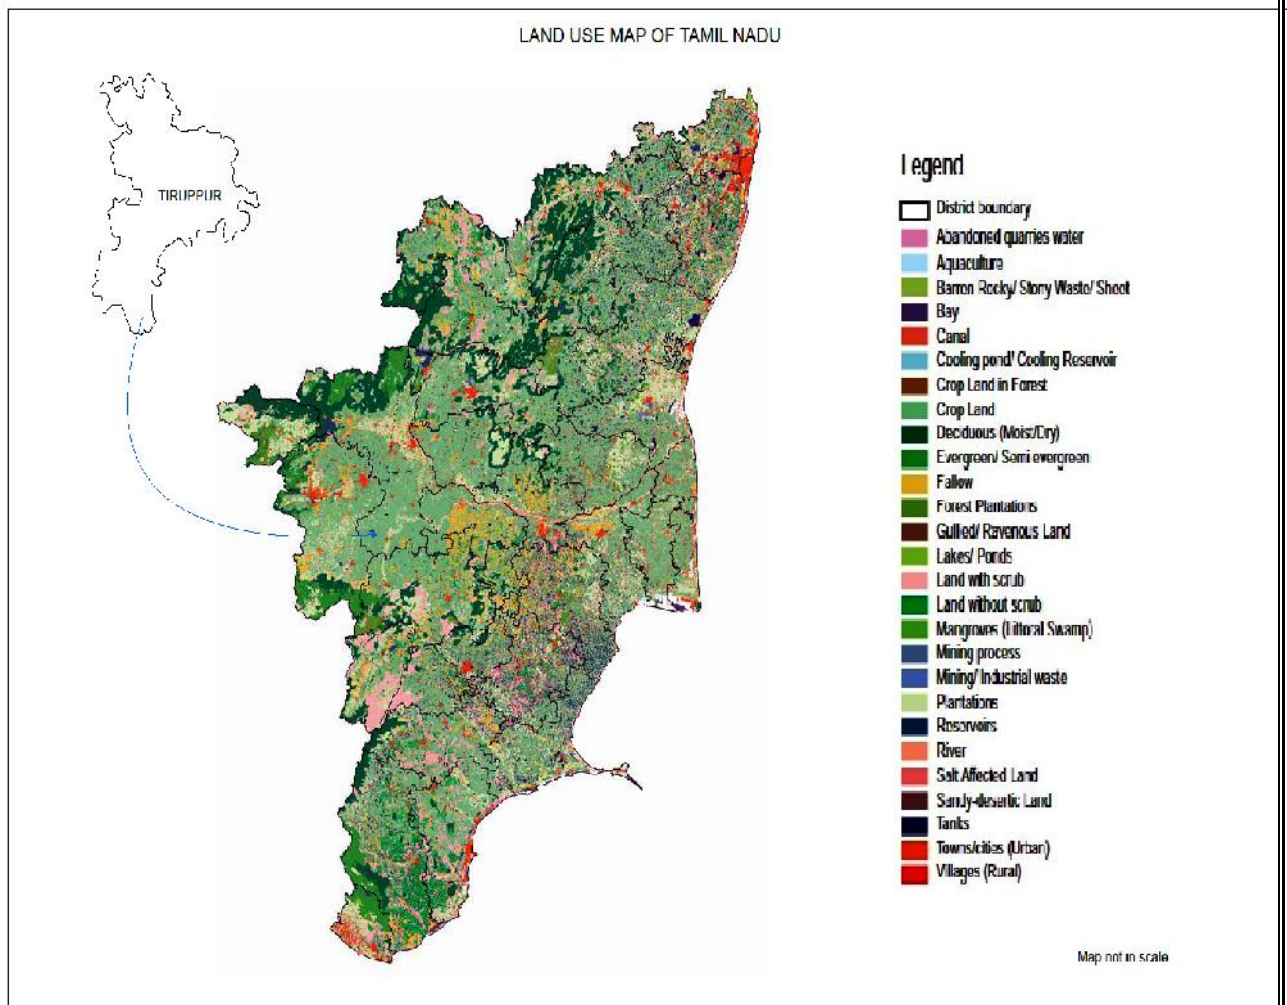

6. Land utilisation Pattern in the District: Forest, Agricultural, Horticultural, Mining, etc.,

The Geographical area of Tiruppur is 5,19,559 ha. According to professional survey and also village records, the land use pattern during 2011 is indicated in the following Table

Classification	Area in Hectare Classification of Tiruppur District
Total Geographical Area	5,19,559
Forest	48,168
Barren and Uncultivable uses	2,541
Land put to Non – Agricultural Uses	68,677
Cultivable Waste	3,926
Permanent Pastures and other gazing land	126
Land under miscellaneous trees crops and groves not included in Net area sown	1,883
Current fallows	91,152
Other fallow land	1,07,985
Gross	1,99,918
Net area sown	1,95,101
Gross Area sown	1,99,918

Source : Land utilization Pattern (2011)

Plate – 3 : LAND USE MAP OF TIRUPPUR DISTRICT

7. Surface Water and Ground water scenario of the District Ground water:

Ground Water is found beneath the earth's surface and is an important source of water in most of the Districts in the State. Ground Water is withdrawn for Agriculture, Municipal and industrial use. The depth at which the ground water is found is called Ground water Table. The district is classified into different blocks based on the ground water abstraction rate.

Over exploited (Greater than 100%)	Critical (Between 90 and 100%)	Semi – Critical (70 – 90%)	Safe (Less than 70%)
Avinashi	Gudimangalam Palladam udumalpet	Pongalur	Dharapuram Kangayam Kundadam Madathukulam Moolanur Tiruppur Uthukuli Vellakovil

Source : State Ground and Surface water resources Data Centre.

Surface water

The major rivers flowing through the district are Noyyal and Amaravathi (Figure 50). The Amaravathi River is the main source of irrigation in the district. Amaravathi Dam, which created Amaravathi Reservoir, is located at Amaravathinagar.

The Amaravathi rises in the Anjanad Valley in the Kerala State between the Anaimalai and the Palanis hills. The Chinnar river originates from Anamalai hills joins with another river called Tenar of Palani hills, and form a Amaravathi river. It descends in a northerly direction and debouches into the plains near Kallapuram at the mouth of the Anjanad Valley in the Udumalpet Taluk. It then runs north-east and receives the Kudiriyar from the Dindigul district on the right at Kumaragam. Thereafter, it flows into the Dindigul district to emerge again into the Dharapuram taluk. Here, after passing the town of Dharapuram and receiving the Uppar on its left, it goes along a winding course, fed by a few small streams, and finally leaves the district and enters the Karur district and falls into the Cauvery at Kattalai in the Kulitalai taluk.

8. Rainfall of the District and Climate Conditions.

Rainfall

The area receives rainfall through both south-west and north-east monsoons. About 40 percent of the precipitation is contributed by south-west monsoon and northeast monsoon accounts for 50 to 60 percent. The average annual rainfall for the basin area is 720 mm.

Climatic Conditions.

The basin area experiences tropical climate being hot and dry for the greater part of the year. The period from March to June is generally hot. The temperature ranges from 20° to 38°C

9. Details of the mining leases in the District as per the following format:-

Name of the Mineral : Rough Stone and Gravel

Sl. No	Name of the Mineral	Name of the Lessee	Address & Contact No. of Lessee	Mining Lease Grant order No. & Date	Area of Mining Lease (Ha.)	Period of Mining Lease (Initial)		Period of Mining lease (1 st /2 ndrenewal)		Date of Commencement of Mining Operations	Status (Working/ Non-Working/Temp. Working for dispatch etc.,)	Captive / Non-Captive	Obtained Environmental clearance (Yes/No), If yes letter No. with date of grant of EC.	Location of the Mining Lease (Latitude & Longitude)		Method of Mining (Open cast / Under ground)
						From	To	From	To					15	16

11. Details of Production of Minor Mineral in last three years (2016-17 to 2018-19)

The year wise production of Rough stone mineral during the last three years is given below:

Year	MINERAL PRODUCTION (in Cbm)	
	Rough Stone	Total Production
1	2	3
2016 - 17	1472498	1472498
2017 - 18	2027317	2027317
2018 - 19	2034331	2034331

13. List of Letter of Intent (LOI) Holders in the District along with its validity as per the following format:-

Sl.No.	Name of the Mineral	Name of the lessee	Address & contact no. of letter of Intent holder	Letter of Intent Grant order No. & date	Area of mining lease to be allotted (Ha)	Validity of LOI	Use (Captive/ Non-captive)	Location of the Mining lease (Latitude & Longitude)
1	Rough Stone	Kandasamy Gounder & 2 other,	Velampalayam, Nagama naickenpatti, Uthamapalayam, Kangeyam	397 / mines / 2015 dated 21.07.2016	2.12.0	-	Non Captive	10°53'16" N to 10°53'10" N 77°44'04" E to 77°43'56" E
2	Rough Stone	R. Senthil Kumar	S/o. Ramasamy, 45/1, Ellish Nagar, Dharapuram	179 / Mines / 2017 dated 24.03.2017	2.50.0	-	Non Captive	10°40'55.00" N to 10°41'03.44" N 77°34'32.03" E to 77°34'40.01" E
3	Rough Stone	K. Eswaran	S/o. Kuppusamy Gounder, Chinna Kalipalayam, Iduvampalayam, Tiruppur	12 / Mines / 2017 dated 02.04.2018	1.73.0	-	Non Captive	10°40'55.00" N to 10°41'03.44" N 77°16'35.18" E to 77°16'40.75" E
4	Rough Stone	R. Jegadeeswaran	S/o. Ramasamy Gounder, 4/1136, Narasingapuram, Krishnapuram post, Madathukulam	1302 / Mines / 2017 dated 19.04.2018	2.52.0	-	Non Captive	10°34'49.97" N to 10°34'57.89" N 77°20'21.71" E to 77°20'30.89" E
5	Rough Stone	M. Balasubramaniam	S/o. Muthusamy Gounder, 173/228, Ayyan thottam, Kilangundal, Dharapuram	457 / Mines / 2017 dated 20.4.2018	1.77.5	-	Non Captive	10°44'12.39" N to 10°44'18.94" N 77°43'22.00" E to 77°43'25.27" E

14. Total mineral reserves available in the District:-

Name of the Mineral: Rough Stone and Gravel

In general reserve estimations for major minerals have been done by Geological Survey of India and reserve estimation for minor minerals have not done by GSI. However, Quantity (mineral reserves) of Roughstone available for each lease has been furnished as per Mining plans.

Sl. No	Name of the Mineral	Name of the Lessee	Address & Contact No. of Lessee	Mining Lease Grant order No. & Date	Area of Mining Lease (Ha.)	Period of Mining Lease (Initial)		Date of Commencement of Mining Operations	Status (Working / Non-Working / Temp. Working for dispatch etc.)	Captive / Non-Captive Obtained	Environmental clearance (Yes/No), If yes letter No. with date of grant of EC.	Location of the Mining Lease (Latitude & Longitude)	Total Quantity in Cbm

15) Quality/ Grade of Mineral available in the district

Rough Stone:-

➤ Charnockite

The charnockite includes felsic and rich in quartz and microcline, others mafic and full of pyroxene and olivine, A special feature, recurring in many members of the group, is the presence of a strongly pleochroic, reddish or green orthopyroxene (formerly known as hypersthene).

Rocks of the charnockite series may be named by adding orthopyroxene to the normal igneous nomenclature (e.g. orthopyroxene-granite).

Chemical composition of the Charnockite (Rough stone) available in the district is given below.

Chemical Composition	Ranges in %
SiO ₂	46 – 49 %
Al ₂ O ₃	1 – 3 %
Fe ₂ O ₃	1.16
FeO	21 – 33%
MgO	12 – 20%
MnO	0.3 – 0.8
CaO	0.04 – 2.0
Na ₂ O	0.02 – 0.50
K ₂ O	0.02 – 0.30

➤ Granitic Gneiss

Gneiss is a high grade metamorphic rock. This means that gneiss has been subjected to more heat and pressure than schist. This banding has alternating layers that are composed of different minerals.

Chemical Composition	Ranges in %
SiO ₂	55 %
Al ₂ O ₃	15-18 %
CaO	1.5-2 %
MgO	2.5 – 3.5%
Fe ₂ O ₃	2-3%
Na ₂ O	0.50 – 1%
K ₂ O	3.5 -4.0 %
Specific Gravity	1.5 gm/cc
Bulk Density	2.7 gm/cc

16. Use of Mineral

Rough stone:

Aggregates – stone used for its strong physical properties – crushed and sorted into various sizes for use in concrete, coated with bitumen to make asphalt or used 'dry' as bulk fill in construction. Mostly used in roads, concrete and building products.

17. Demand and Supply of the mineral in the last three years:-

Among all the minerals, there is a huge demand for Rough stone in the district due to the sudden increase of Construction activities and highway projects around the district. Hence, the production of the rough stone and revenue realised for the past three years is as follows:-

S. No	Year	Production of Rough Stone	Revenue realized
1	2016 – 17	1472498	6,99,77,925
2	2017 – 18	2027317	9,10,13,437
3	2018 – 19	2034331	11,98,47,200

18. Mining leases marked on the Map of the District

Plate 5-i (Mining leases marked in the Avinashi Taluk map)

Plate (5-iii) Mining leases marked in the Kangeyam Taluk map

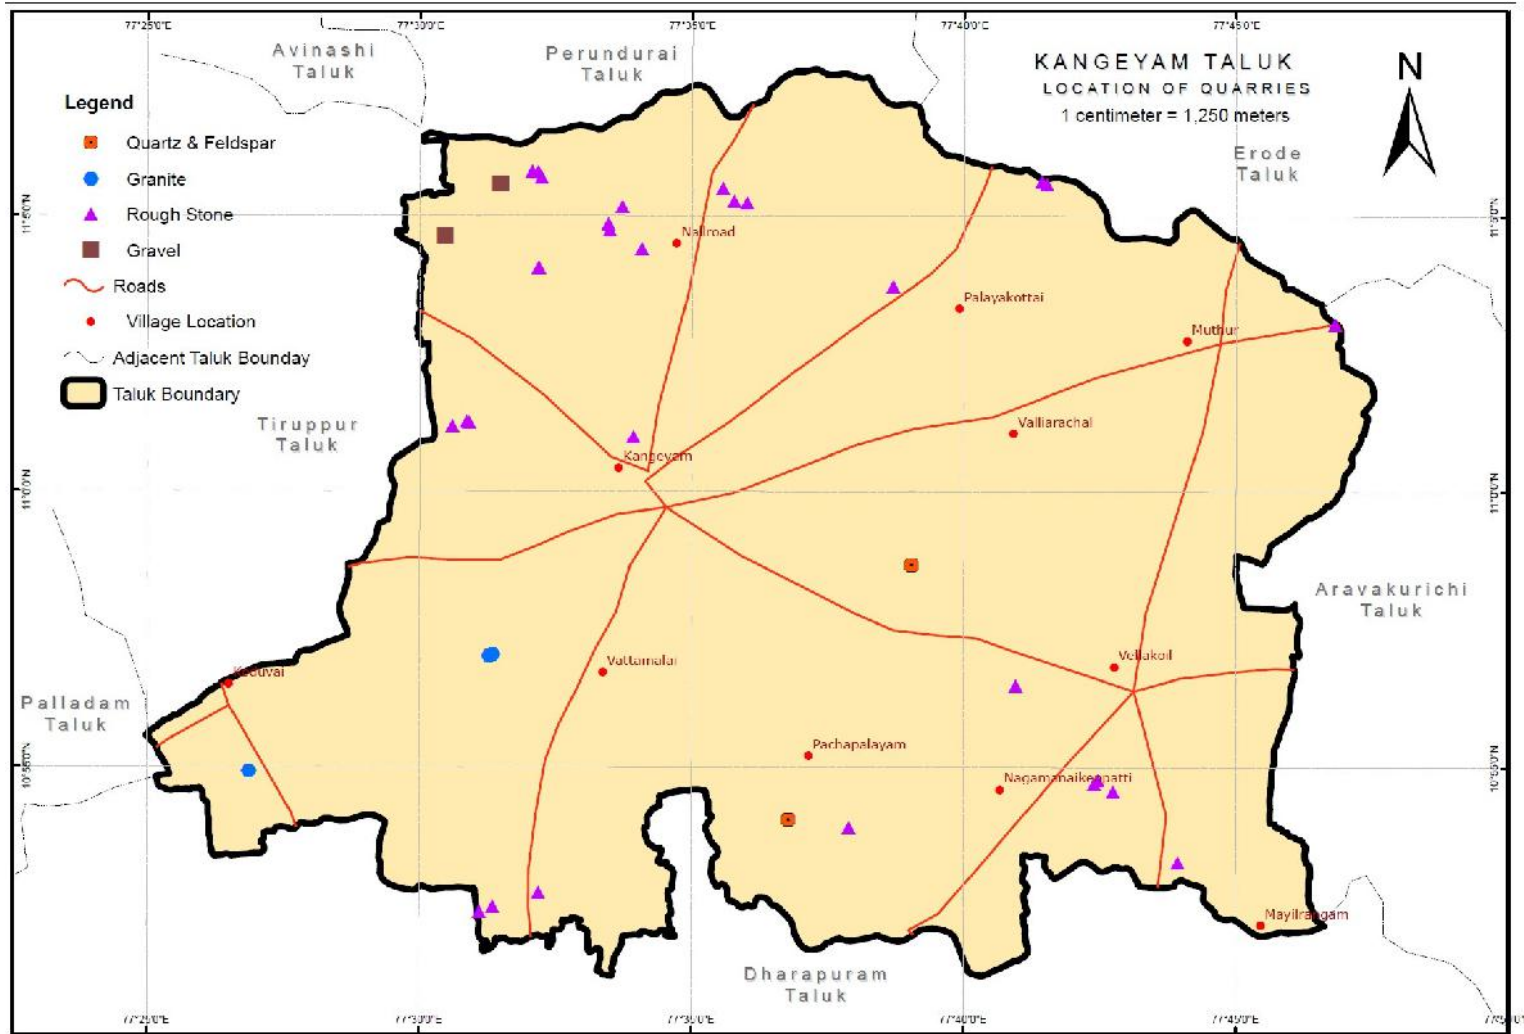

Plate (5-iv) Mining leases marked in the Madathukulam Taluk map

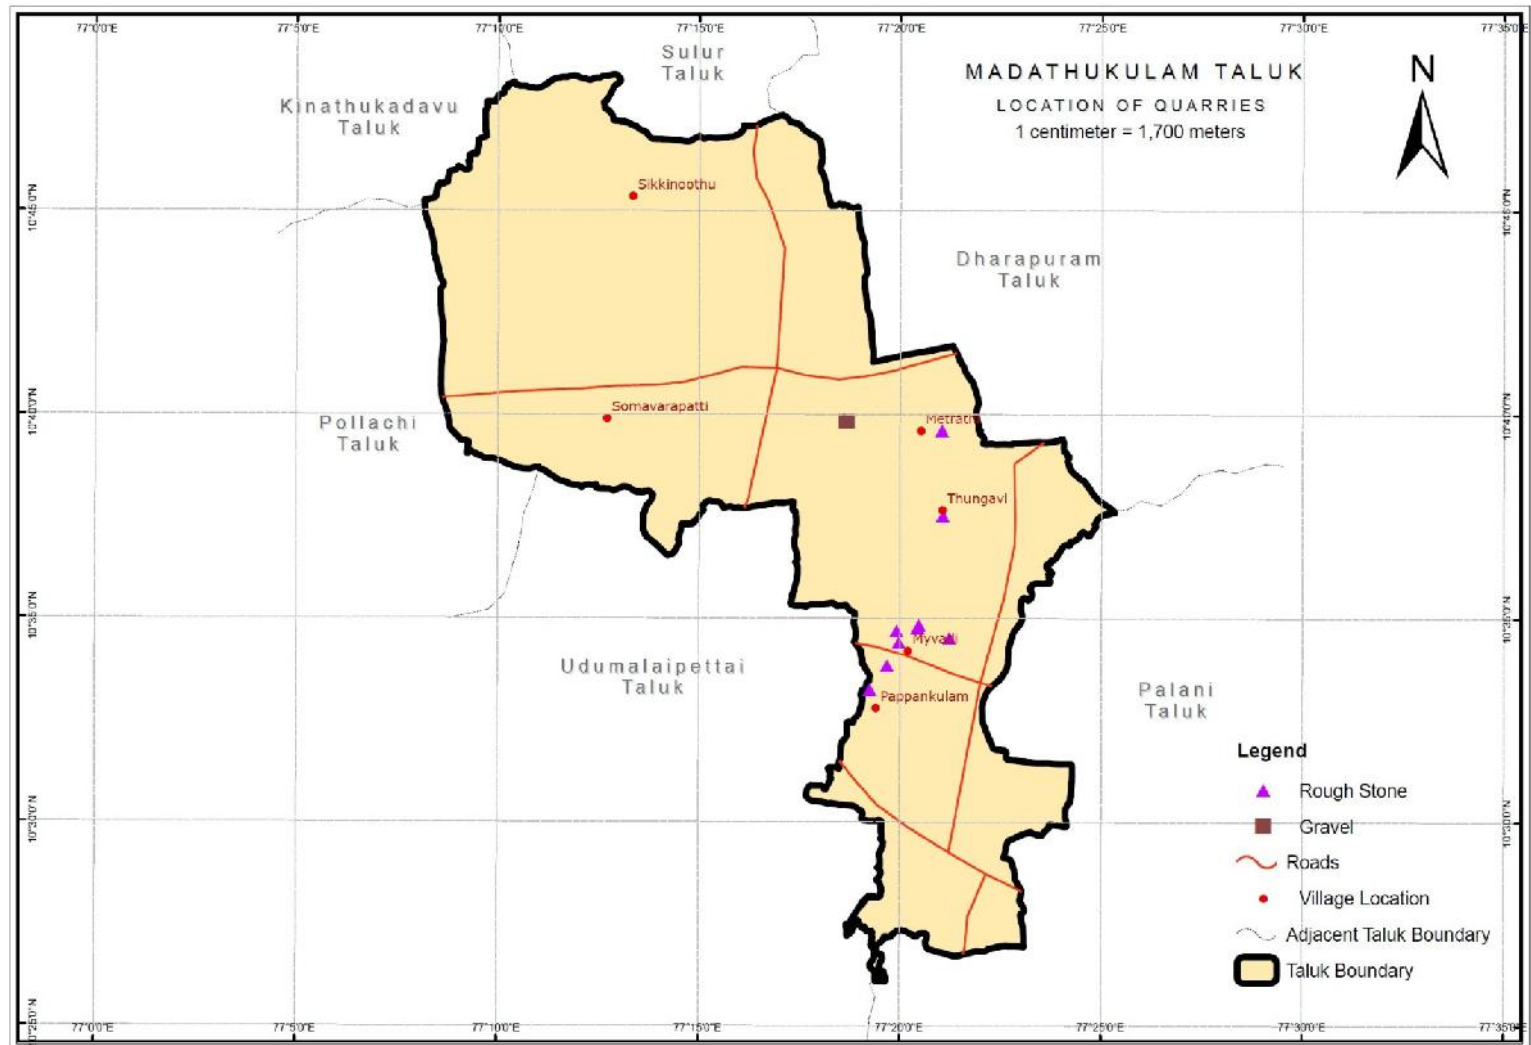

Plate (5-v) Mining leases marked in the palladam Taluk map

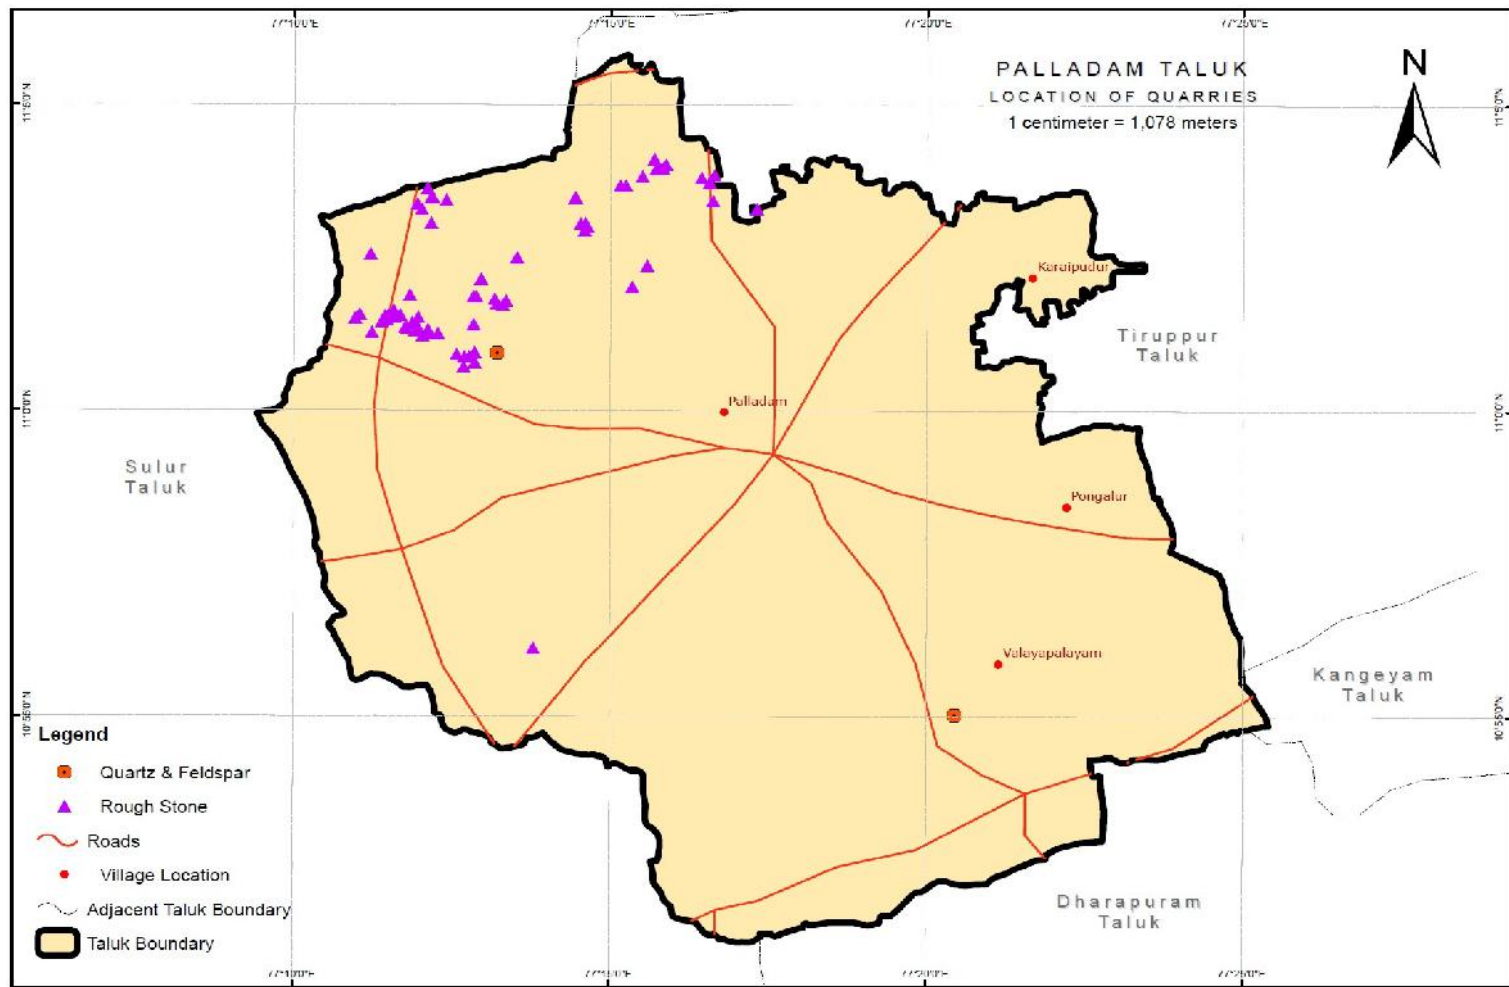

Plate (5-vi) Mining leases marked in the Tiruppur Taluk map

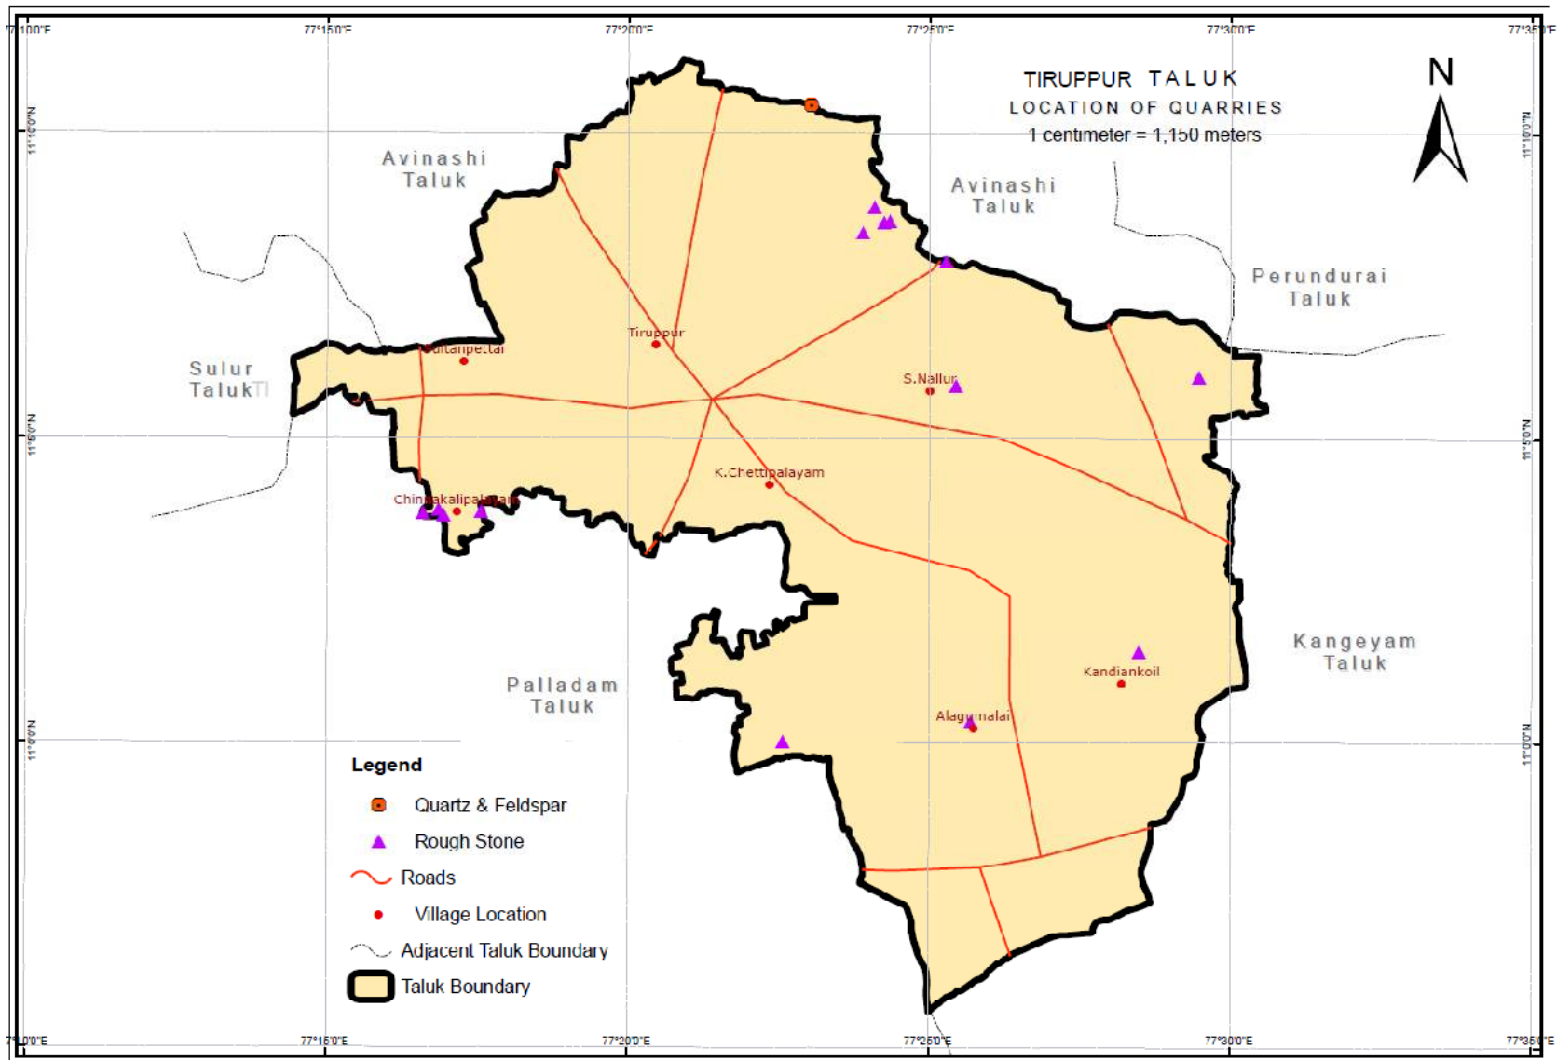

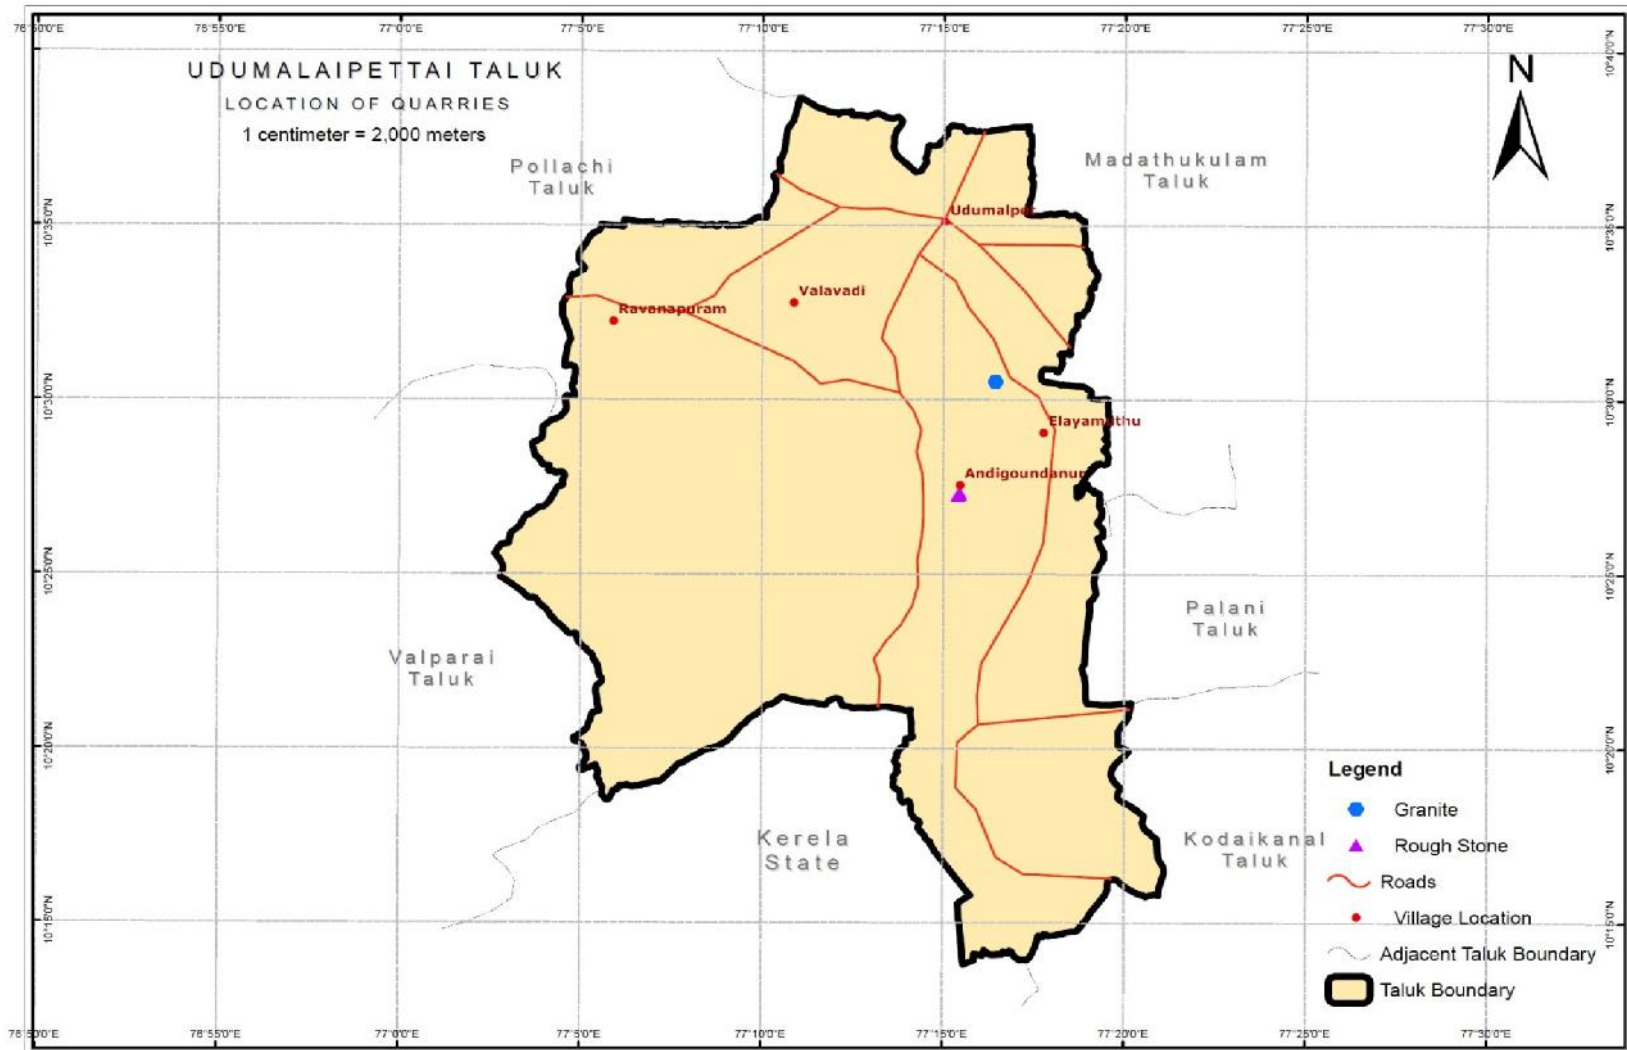

Plate (5-vii) Mining leases marked in the udumalpet Taluk map

Rough Stone (Charnockite and Granite Gneiss)

Charnockite is extensively quarried as rough stone which is used as aggregates for construction of building, laying of roads and for preparation of value added products like hollow blocks, M-sand etc.,. In places like Uthukuli the Charnockite rock is used to make wet grinder stones. Charnockite is exposed as discontinuous body in ENE-WSW direction from Karanampettai in the west to Unjappalayam in the east and from Pallapalayam in the north to Kodangipalayam-Sukkampalayam in the south. An isolated Charnockite body is exposed for a length of 4km with 1to 1.5 km wide from Sedarpalayam-Morattupalayam in the north to Velliampalayam-Sarkar Periyapalayam in the south. Charnockite is very well exposed in NW Madathukulam area of Udumalai Taluk. East-west trending rock is available for more than 5 km length with 2 km width. Active quarries are located in Kodangipalayam (Plate 7 & 8), Ichipatti, 63.Velampalayam, Iduvoi, Boomalur, Naranapuram, Sukkampalayam, Pongupalayam, Timmanayakkanpalayam, Govindampalayam, Morattupalayam, Uthukuli, A.Periyapalayam and Myvadi. The following table showing the details of potential Charnockite Rock deposited areas:

Name of the Villages	Co-ordinates	Tentative Area of the block
Chinnagoundanpudur, Parapalayam, Kulathupudur, Sultanpet, Chinnandipalayam, Pukkulipalayam, Kavilipalayam, Kangayampalayampudur, Sevanthampalayam, Rakkiapalayam, Ganapathipalayam, Nallur.	11° 4' 10" to 11° 7' 50" 77° 15' 50" to 77° 24' 1"	10 Sq km
Kidathuraipudur, Velayuthampalayam, Unjapalayam, Naduvelampalayam, Sukkampalayam, Kodangipalayam, Ichipatti, 63.Velampalayam, Pongupalayam, Sengodampalayam, Kasigoundanpudur, Devarayampalayam, Ayyampalayam, Samalapuram, Perumapalayam, Kalipalayam, Poomalur, Naranapuram, Manickapuram, Thekkupalayam, Rasagoundampalayam, Kalivelampatti.	9° 58' 00" to 11° 5' 7" 77° 8' 00" to 77° 18' 3"	15 Sq km

Jallipatti, Selaiyur, Olapalayam, Marappa- goundampalayam, Velayanpudur, Idaiyapatti, Sengalipalayam, Ruthravathi, Palaya Rudhravathi, Ganapathipalayam, Kalipalayam, Ammapalayam, Kanakkampatti, Thangaipudur, Muthugoundanpudur, Valasupalayam, Salaipudur, Merkku Sadayampalayam, Karuppattipalayam, Panapalayam, Marudhur, Molarappatti, Thimmanaickenpalayam.	10° 41' 48" to 10° 53' 30" 77° 13' 29" to 77° 28' 0"	22 Sq km
Kannamanaickenur, Maivadi, Malayandipattinam, Oralappatti, Narasingapuram, Pappangulam, Reddipalayam, Pottinayakkanur, Jalarapatti, Kannadiputhur, Madathlukulam, Sengalanipudur, Vedapatti	10° 30' 15" to 10° 36' 42" 77° 15' 3" to 77° 22' 58"	13 Sq km
Morattupalayam, Govindampalayam, Thimma- naickenpalayam, Velliyampalayam, Kadapalayam, Pachangattupalayam, Mettupudur, Karattupalayam, Sirukalanchi, Kuttampalayam, Vengalapalayam, Pappanpalayam, Vayakattupudur, Pooluvapatti, Chinnapudur.	11° 5' 46" to 11° 11' 23" 77° 24' 11" to 77° 30' 34"	12 Sq km

The depth of quarrying in the Charnockite rocks for excavating Rough Stone in the above said villages varies from 10m to more than 45 metres. As the Charnockite rock is predominantly massive and without joints in nature, the water table has not encountered upto the known depth of 45 metres. Hence, the depth of quarrying of Rough Stones may be allowed 2 meters above the ground water table level. The thickness of the weathered part which occurs over the Charnockite varies from 2m to 5m and it varies from place to place. The weathered part is used as earth fill (locally called as gravel).

Plate 6. Field photograph of Charnockite quarry located in Kodangipalayam, Palladam Taluk of Tiruppur district (Lat:11°2'13.35"& Long: 77° 13'19.31").

Plate 7. Field photograph of Charnockite quarry located in Kodangipalayam, Palladam Taluk of Tiruppur District (Lat:11°1'50.96"& Long: 77° 13'10.83").

Quarries for Rough Stone in hornblende biotite gneiss rock deposits are located in Kiranur area of Kangeyam Taluk (Plate 9), 5 km north of Amaravati Dam in Udumalpet Taluk and 15.Velampalayam of Tiruppur North Taluk. Hornblende biotite

gneiss is vastly exposed in south and west of Vellakkovil area of Dharapuram Taluk. In SSE of Udiyur and east of Thayamangalam, few quarries are located in the pyroxene granulite which is trending NE-SW direction. In, south of Vellakovil area, the predominantly exposed country rock is hornblende biotite gneiss and intrusive granites as in Mudalipalyam, Sangarandampalayam, Peralaiykkattuvalasu, etc.

Plate 8. Field photograph of quarry in hornblende biotite gneiss exposed in Kiranur area of Kangayam Taluk (Lat:11°04' 09" & Long:77° 35'01").

19. Details of the area where there is a cluster of mining viz., number of mining leases, location (latitude and longitude):-

S. No.	Name of the Mineral	Letter of Intent Grant order No. & date	Area of mining lease to be allotted (Ha)	Village	Taluk	District	Geological Reserves (Mill.Tons)	Use (Capitive /Non-capitive)	Location of the Mining lease (Latitude & Longitude)
Not Applicable									

20. Details of Eco – Sensitive Area, if any, in the District.

Aanaimalai Tiger Reserve, earlier known as Indira Gandhi Wildlife Sanctuary and National Park (IGWLS&NP) and previously as Aanaimalai Wildlife Sanctuary, is a protected area located in the Anaimalai Hills of Pollachi and Valparai taluks of Coimbatore District and Udumalaipettai taluk in Tiruppur District, total area of 1479.87 km².

21. Impact on the Environment (Air, Water, Noise, Soil Flora & Fauna, Land use, Agriculture, Forest etc.) due to Mining Activity

Generally, the Environmental impacts can be categorized as either primary or secondary. Primary impacts are those, which are attributed directly by the project, secondary impacts are those, which are indirectly induced and typically include the associated investment and changed pattern of social and economic activities by the proposed action.

The impact has been ascertained for the project assuming that the pollution due to mining activity has been completely spelled out under the baseline environmental status for the entire ROM which is proposed to exploit from the mines.

Air

Mining Operations are carried out by opencast semi mechanized/ Mechanized method, dust particles are generated due to various activities like, Excavation, Loading, handling of mineral and transportation. The air quality in the mining area depends upon the nature and concentration of emissions and meteorological conditions.

The major air pollutants due to mining activity includes:-

- Particulate Matter (Dust) of various sizes.
- Gases, such as, Sulphur Dioxide, Oxides of Nitrogen, Carbon Monoxide etc., from vehicular exhaust.
- Dust is the single Air pollutant observed in the open cast mines. Diesel operating drilling machines, small amount of blasting and movement of machinery/ vehicles

produce NO_x,SO₂and CO emissions, usually at low levels. Dust can be of significant nuisance surrounding land users and potential health risk in some circumstances.

Water Impact

The mining operation leads to intersect the water table cause ground water depletion. Due to the interruption surface water sources like River, Nallah, Odai etc., surface water system, Drainage pattern of the area is altered.

Noise

Noise pollution is mainly due to operation of Machineries and occasional plying of machineries. These activities will create Noise pollution in the surrounding area.

Land Environment

The topography of the area will change, due to the Topographical changes the entire Eco system will be altered.

Flora and Fauna

The impact on biodiversity is difficult to quantify because of its diverse and dynamic characteristics.

Mining activities generally result in the deforestation, land degradation, water, air and noise pollution which directly or indirectly affect the faunal and floral status of the project area.

However, occurrence and magnitude of these impacts are entirely dependent upon the project location, mode of operation and technology involved.

22. Remedial Measure to mitigate the impact of Mining on the Environment

Air

Mitigated measures suggested for air pollution controls are based on the baseline ambient air quality of the area

The following measures are proposed to adopted in the mines such as,

- Dust generation shall be reduced by using sharp teeth of shovels.
- Wet drilling shall be carried out to contain the dust.
- Controlled blasting techniques shall be adopted.
- Water spraying on haul roads, service roads and overburden dumps will help in reducing considerable dust pollution.
- Proper and regular maintenance of mining equipment's have to be considered.
- Transport of material in trucks covered with tarpaulin.
- The mine pit water can be utilized for dust suppression in and around mine areas.
- Information on wind direction and meteorology will be considered while planning, so that pollutants, which cannot be fully suppressed by engineering technique, will be prevented from reaching the nearby agriculture area.
- Comprehensive green belt around overburden dumps has to be carried out to reduce to fugitive dust emissions in order to create clean and healthy environment.

Water

- Construction of garland drains to divert surface run-off into the mining area.
- Construction of check dams / gully plugs at strategic places to arrest silt wash off from broken up area.
- Retaining walls with weep hole will be constructed around the mine boundariesto arrest silt wash off.
- The mined out pits shall be converted into the water reservoir at the end of mine life. This will help in recharging ground water table by acting as a water harvesting structure.
- Periodic analysis of mine pit water and ground water quality in nearby villages.
- Domestic sewage from site office & urinals/latrines provided in ML is discharged in septic tank followed by soak pits.

Noise

Mitigation measures

- Periodic maintenance of machinery, equipment'sshall be ensured to keep the noise generated at minimum.

- Development of thick green belt around mining area and haul roads to reduce the noise.
- Provision of earplugs to workers exposed to high noise generating activities. Workers and operators at work site will be provided with earmuffs.
- Conducting periodical medical checkup of all workers for any noise related health problems.
- Proper training to personnel to create awareness about adverse noise level effects.
- Periodic noise monitoring at suitable locations in the mining area and nearby habitations to assess efficacy of adopted control measures.
- During the blasting, optimum Spacing, Burden and charging of holes will be made under the supervision of competent qualified mines foreman, Mate as approved by Director of Mines safety.

Biological Environment MITIGATION MEASURES:

- Development of gap filling saplings in the safety barrier left around the quarry area.
- Carrying out thick greenbelt with local flora species predominantly with long canopy leaves on the inactive mined out upper benches.
- Development of dense poly-culture plantation using local flora species in the mining area at conceptual stage.
- Adoption of suitable air pollution control measures as suggested above.
- Transport of materials in trucks covered with tarpaulin.
- Construction of garland drains and settling tank to arrest silt wash off from lease area.
- Construction of retention walls around lower boundary of mining area to arrest silt washoff and roll down boulders.
- Retaining walls with weep hole will be constructed around the mine boundaries to arrest silt wash off.

23. Reclamation of Mined out area (Best practice already implemented in the district, requirement as per rules and regulation, proposed reclamation plan):-

Under Rule 23A, Mine Closure Plan: Every mine shall have Mine Closure Plan, which shall be of two types:-

- (i) Progressive mine closure plan; and
- (ii) Final mine closure plan.

Conceptual Final Landform-

The broad rehabilitation objective for the post-quarry landform is to establish a similar land use on the disturbed areas, with the exception of the final void. The topography of the final landform will consist of a large number of stepped benches formed in an amphitheater configuration, each with a re-vegetated bench as shown in Figure-1.

Figure 2 shows plan and sectional views of the final landform. The void will be some approximately 1.88.8 Ha in area. Until such time that extraction has ceased, rehabilitation will occur around the perimeter of the pit only along the benches, and will not involve the pit floor. The primary purpose of rehabilitation during the operational phase is to mitigate any visual impacts.

Once operations have ceased, all buildings and infrastructure will be removed. These areas will be reshaped and ripped where necessary for top-soiling and re-vegetation. The top benches will be vegetated with appropriate native species. The lower benches will be formed as a shallow depression of retention pond/ rain water harvesting structure.

Plate 9- Example of Bench Rehabilitation

Rehabilitation and Re-vegetation –

Rehabilitation of the site will be undertaken once extraction is complete. As the extraction progresses through the resource, 5 m wide benches will be left every 5 m of depth to provide a horizontal platform on which native flora species will be established.

The plantation in the mine lease area also includes gap filling plantation on the safety barrier zone left around the mine lease area. Gap filling plantation has been carried out in the safety barrier zone left around the mine lease area from the beginning of the mining operations.

Additional plantation will be carried out in the inactive mining area. Grass and bushes will be planted in areas prone to erosion. Other areas will be spread with organic manures and planted with local species.

The characteristics of this vegetation will resemble that of the natural environment except for the early growth, which may be a protective cover crop of non-seeding annuals. Before re-vegetation, the land will be properly prepared by spreading the top soil, which is rich in organic contents along with mulches and organic manure. Vegetation will be self-sufficient after planting and require no fertilizers or maintenance.

The re-vegetation program will re-establish native tree / shrub / ground cover and will stabilize reshaped and benched areas. Benches will be deep ripped to actively promote infiltration of water which will enhance soil moisture requirements for direct tree seeding and minimize surface runoff to underlying benches. Re-vegetation will also visually screen disturbed areas and will re-establish habitat for native fauna.

24. Risk Assessment & Disaster Management Plan:-

The Disaster Management Plan (DMP) is supposed to be a dynamic, changing, document focusing on continual improvement of emergency response planning and arrangements.

The disaster management plan is aimed to ensure safety of life, protection of environment, protection of installation, restoration of production and salvage operations in this same order of priorities. For effective implementation of the disaster management plan, it

should be widely circulated and personnel training through rehearsals/induction conducted by the respective department from time to time.

General Responsibilities of Employees during an Emergency:

During an emergency, it becomes more enhanced and pronounced when an emergency warning is raised, the workers in-charge, should adopt safe and emergency shut down and attend any prescribed duty as essential employee. If no such responsibility is assigned, he should adopt a safe course to assembly point and await instructions. He should not resort to spread panic. On the other hand, he must assist emergency personnel towards objectives of DMP.

Co-ordination with Local Authorities:

The mine manager who is responsible for emergency will always keep a jeep ready at site. In case any eventualities the victim will be taken to the nearby hospitals after carrying out the first aid at site. A certified first aid certificate holder will be responsible to carry out the first aid at site. The mine manager should collect and have adequate information of the nearby hospitals, fire station, police station, village panchayat heads, taxi stands, medical shop, district revenue authorities etc., and use them efficiently during the case of emergency.

25. Details of the Occupation Health issues in the District. (Last five-year date of number of patients of Silicosis & Tuberculosis is also needs to be submitted):-

As per the guidelines of the Mine Rules 1955, occupational health safety stipulated by the ILO/WHO. The proponent's will take all necessary precautions. Normal sanitary facilities should be provided within the lease area. The management will carry out periodic health checkup of workers.

Occupational hazards involved in mines are related to dust pollution, Noise pollution, blasting and injuries from moving machineries & equipment and fall from high places. DGMS has given necessary guidelines for safety against these occupational hazards. The management will strictly follow these guidelines.

All necessary first aid and medical facilities will be provided to the workers. The mine shall be well equipped with Personal Protective Equipment (PPE). Further all the

necessary protective equipment's such as helmets, safety goggles, earplugs, earmuffs, etc. will be provided to persons working in mines as per Mines Rules. Alloperators and mechanics will be trained to handle fire-fighting equipment's.

26. Plantation of Green Belt development in respect of leases already granted in the District:-

Green Belt Development

- ❖ A well planned Green Belt with multi rows (Three tier) preferably with long canopy leaves shall be developed with dense plantations around the boundary and haul rods to prevent air, dust noise propagation to undesired places. Efforts will be taken for the enhancement of survival rate since the soil is alkaline in nature.

Species Recommended for Plantation

Following points have been considered while recommending the species for plantation:

- ❖ Natural growth of existing species and survival rate of various species.
- ❖ Suitability of a particular plant species for a particular type of area.
- ❖ Creating of bio-diversity.
- ❖ Fast growing, thick canopy cover, perennial and evergreen large leaf area,
- ❖ Efficient in absorbing pollutants without major effects on natural growth.
- ❖ The following species may be considered primarily for plantation best suited for the prevailing climatic condition in the area.

RECOMMENDED SPECIES TO PLANT IN THE GREENBELT

S.No	Name of the plant (Botanical)	Family Name	Common Name	Habit
1.	<i>Azadirachta indica</i>	<i>Meliaceae</i>	Neem, Vembu	Tree
2.	<i>Albizia falcataria</i>	<i>Fabaceae</i>	Tamarind, Puliymaram	Tree
3.	<i>Polyalthia longifolia</i>	<i>Annonaceae</i>	Kattumaram	Tree
4.	<i>Borassus flabellifer</i>	<i>Arecaceae</i>	Palmyra Palm	Tree

27. Any other information:-

The details related to the occurrence of mineral resources and other data of the district are subject to updation from time to time. Before grant of any quarry lease, the parameters related to geosciences and sustainable developments are to be considered on the basis of ground reality.

The Tiruppur District is having very large deposits of Charnockite rock which is the raw material for the production of aggregates and M-sand. M-sand is the need of the hour to replace the utilisation of river sand. The Charnockite / Rough Stones are crushed in the crushing units for the manufacture of aggregates and M-sand which gives direct and indirect employment to the local people. Preferences and encouragements can be given to the Entrepreneurs for set up of new units for the production of M-sand and tracking of mined out minerals will fetch more revenue to the State Exchequer as well as sustainable development.

Sd/- K.S. Palanisamy,
District Collector,
Tiruppur.
